

Go Mobile with Swank Audio Visuals' M3 Online Event Technology

Revolutionize how your attendees receive event information and drastically reduce the time and money you spend on printed materials! Swank Audio Visuals' Mobile Meeting Manager® will transform your attendee's smartphones and tablets into an interactive, central event resource, loaded with your agenda, meeting session times and locations, exhibitor lists and more.

Not only will your attendees appreciate this modern alternative to bulky informational packets, but Swank's M3 team will save you time by developing the Web-based mobile app for you.

Save money by nearly eliminating your print costs and even the frustrating reprinting costs. With M3, you can easily accommodate changes to the meeting times and locations, speaker, etc., by instantly communicating updates, keeping your attendees well-informed. Changes can even be made during your event, if necessary.

These "green advantages" from reducing paper waste also translate into improved electronic benefits that your attendees will love. With the Favorites lists, attendees can create personal schedules, preferred speakers lists and more. M3 can provide an outlet for attendees to network with one another and view venue maps. As a Web-based app, M3 is compatible with most smartphones and tablets.

Let Swank's professional, full-service team deliver Flawless Execution for your event every time. From spectacular theming, design and budgeting, to the last technical detail, we'll take care of everything — all at a low daily cost.
